NATIONAL HELICOPTER SERVICES LIMITED

CAREER OPPORTUNITY

National Helicopter Services Limited, a leading provider of helicopter transport and related services to the energy and state sectors, is seeking to recruit a suitably qualified professional to fill the following position:

QUALITY MANAGER

Reporting to the General Manager, the Quality Manager is responsible for compliance monitoring and ensuring that the procedures required for airworthy aircraft and safe operational practices are in keeping with both governing regulations and the established Quality Management System. The incumbent must be able to foster a positive culture of compliance, accountability and continuous improvement.

Key Duties:

- Manages the Quality System, ensures its continuous improvement and compliance with regulatory requirements as it supports the effective functioning of the company's operations.
- Formulates and executes the department's audit plan and manages the timely resolution of findings and the implementation of the appropriate corrective actions.
- Determines and implements specific quality departmental goals which support the organisation's strategy and its fiscal and operational objectives.
- Liaises and represent NHSL as may be appropriate on matters related to the Quality System and its functioning with the regulatory authorities and other appropriate stakeholders.
- Grants authorisation to qualified individuals to issue the Certificate of Release to Service and special authorisations to issue Certificate of Maintenance Review.
- Assesses / audits suppliers and contractors to ensure that the product or service to be utilised meets the required standards of quality and safety.
- Establishes and maintains effective working relationships with service companies, representatives from Civil Aviation, other regulatory bodies, departmental managers and staff within the Company.
- Trains, develops and evaluates staff under your charge.
- Other duties related to the job function.

Minimum Qualifications Required

- Aircraft Maintenance Engineer's Licence
- Three (3) year's experience in maintaining the same A/C Category and A/C Class used by the organisation including one (1) year in the capacity of returning an aircraft to service.
- At least five (5) years aircraft maintenance experience with at least three (3) years progressive supervisory experience and or two (2) years managerial level experience in aviation quality assurance.
- Certification in Quality Management or a related field
- Post Secondary academic qualifications in Aviation Management, Quality Management, Business Management or a related discipline would be an asset.
- Strong working knowledge of the TTCAA laws and regulations and industry best practices.
- Strong Interpersonal and Communication Skills with an ability to influence key stakeholders towards achieving NHSL's objectives.
- Excellent Analytical and auditing skills.
- Strong supervisory, coaching and conflict resolution skills.
- High degree of integrity, professionalism and corporate spirit.

Interested persons are asked to apply and submit detailed applications with the appropriate documentary evidence of Licences, Academic Qualifications, Training and Experience and the names of two Referees **via the employtt platform** on or **before October 21, 2026.**

ONLY SUITABLE APPLICATIONS WOULD BE ACKNOWLEDGED

ANY APPLICANT WITH MISREPRESENTING INFORMATION WILL NOT BE CONSIDERED
